

# Paul Breslin

## JavaScript Developer

[paul.breslin@outlook.com](mailto:paul.breslin@outlook.com)    075 393 327 68    <http://paulbresl.in>

I am a JavaScript developer currently working at [iwoca](#). I have over 4 years of experience building websites professionally, with a background strongly rooted in startups.

## Work Experience

### Lead Front-end Developer, iwoca, June 2015 - Present

- In addition to previous responsibilities as a front-end developer at iwoca:
  - Performed code reviews.
  - Managed project development (short to long term).
  - Involved in strategic planning and technological architecture.

### Front-end Developer, iwoca, October 2014 - June 2015

- Wrote a modularised loan schedule widget in Angular to replace the varied implementations of loan schedules across the site with a uniform solution.
- Worked on a variety of Angular applications, including a dynamic signup process driven by an API and an interface for a business verification process which featured document uploads and the linking of third-party accounts.
- Wrote a Django app which allowed HR to update vacancies on the website via an admin interface.
- Built a white-labelled broker portal app in Django. Working across the full stack, from server-side views to client-side validation to mobile styling.
- Rebuilt the entire front-end to match a new, responsive design, and completely overhauled the structure of the SCSS codebase.
- Technologies used: **Angular, Git, Django, NPM, Babel, Gulp, Grunt**

### Front-end Developer, Dhalco Web Design, April 2012 - October 2014

- Provided suggestions to clients regarding user experience best practices.
- Predominantly built small websites for clients that were either static or Joomla based.

## Skills

**Fluent in:** JavaScript (including ES6), Angular, Git, Linux, NPM, Gulp

**Exposure to:** Django, React, Mongo, Express, Node, Yeoman
